

PANCHAMI DINESH

Bangalore, Karnataka | Phone no: +91 9380014420

RV UNIVERSITY | COMPUTER SCIENCE ENGINEERING | 2023-2027 | CGPA-8.22

E-Mail Id: panchamidinesh17work@gmail.com **Github:** <https://github.com/panchamidinesh>

LinkedIn: <https://www.linkedin.com/in/panchami-dinesh-a116052a7/>

Languages known: English, Hindi , Kannada

Summary:

Passionate and detail-oriented CS student with hands-on experience in AI-driven systems, NLP, RAG pipelines, cloud technologies, and data engineering. Skilled in building intelligent applications involving semantic search, automation workflows, anomaly detection, and interactive dashboards using Python, FastAPI, AWS, and modern AI frameworks. Strong interest in research, problem-solving, and developing scalable real-world AI solutions.

Educational Qualifications:

Computer Science Engineering, majoring in Data Science & Engineering and minors in Research	CGPA-8.24
PUC from Surana Independent PU college	91.8%

Projects

- ***Automating Knowledge Discovery in Material Science with RAG Framework(Conference paper)***[link](#)
- ***InsightFlow AI :AI-Powered Business Intelligence*** Built a fully local AI system that ingests Excel files, auto-detects KPIs, generates statistical insights, and produces PowerPoint and PDF reports using a local LLM (Llama3.2). Implemented a RAG & natural language Q&A over tabular | [link](#)
- ***Automated Reddit Data Pipeline for Airline Sentiment Analysis Using Prefect and AWS S3:*** Engineered an automated ETL pipeline using Prefect to ingest real-time social media data from the Reddit API into AWS S3 for airline brand monitoring [link](#)
- ***Search Behavior–Driven Skill Demand Analysis using Analytics, NLP, and RAG.*** | Developed a skill demand intelligence system using Google Trends, time-series analysis, NLP clustering, and a FAISS-based RAG pipeline with an interactive Gradio interface. | [link](#)
- ***AI-Powered Project Recommender System:*** Built a intelligent Flask-based web app that suggests hardware projects from user-provided components using Sentence-BERT embeddings and fuzzy NLP [link](#)
- ***Agentic student management system:*** Built an agentic student management system using FastAPI, LangGraph, React, and Tailwind CSS to assess academic risk, recommend interventions, and track decision history through a multi-agent workflow. [link](#)
- ***Real-Time Cloud Cost Optimization Using AI-Driven Anomaly Detection and Machine Learning:*** Built a platform for real-time anomaly detection, cost forecasting, intelligent resource optimization using Machine Learning techniques. Developed an AWS CloudWatch-inspired monitoring dashboard using Streamlit, XGBoost, Prophet, and Isolation Forest for cloud analytics and visualization.[link](#)
